DETAILED ACTION

1. Claims 1-13 are pending in the instant application.

Claim Rejections - 35 USC § 102

2. Claims 1-4 previously rejected under 35 U.S.C. 102(b) as being anticipated by Simons et al, Research Development Journal, and Simons et al, U.S. Pat. 4,255,510 and U.S. Pat. 4,256,881. In view of Applicants' amendatory changes, the anticipation rejections have been obviated and are withdrawn from the claims.

Claim Objections

3. Claims 5-8 were previously objected to as being dependent upon a rejected base claim. In view of Applicants' amendments, the objections are herein withdrawn.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Irving Newman, Reg. No. 22,638 on December 20, 2006.

The application has been amended as follows:

- (a) Claim 10, line 1, please delete the term "medicament" and replace with "pharmaceutical composition".
- (b) Claim 11, line 1, after the term "HSL," please insert the phrase, "for treating a disease selected from the group consisting of non-insulin-dependent diabetes mellitus, diabetes

syndrome, or syndrome X". Also in Claim 11, line 2, please delete the term "medicament" and replace with "pharmaceutical composition".

(c) Claim 12, line 3, please delete the term "medicament" and replace with "pharmaceutical composition".

REASONS FOR ALLOWANCE

5. In view of Applicant's amendatory changes, claims 1-13 are allowable over the prior art. The following is an examiner's statement of reasons for allowance:

This invention relates to novel benzotriazole-carbonyl-piperidine compounds, their derivatives, their pharmaceutical compositions, and their methods of use. The allowable compounds are limited to compounds according to formula I of claim 1. Certain benzotriazole compounds are known in the art as having the ability to inhibit the activity of lipase, however the aspect of preparing the instant claimed benzotriazole-carbonyl-piperidine derivatives, with HSL inhibitory activity, is novel and unobvious. The instant compounds were tested for selective inhibition of HSL enzymatic activity (please refer to inhibitory results, IC_{50} values, etc. found in pages 27-30 of the specification), which makes them useful for treating diabetes, for example. After a thorough search, the closest of prior art, U.S. Pat. No. 4,255,510 and 4,256,881, to Simon et al. was found to teach similar triazole compounds. However the above-mentioned patents fail to teach or render obvious the instant claimed compounds according to formula (I), and do not fairly suggest methods of using the instant claimed compounds as HSL inhibitors for treating diabetes, etc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
